PLEASE NOTE:

The published rates are effective from 22 July 2022. Rates are subject to confirmation on receipt of funds or the renewal of the investment by Mercantile. Please note that rates are reviewed from time to time and are subject to change at the sole discretion of Mercantile and Mercantile is not obliged to amend interest rates if the prime interest rate fluctuates.

The nominal interest rates are used to calculate the daily interest earned on your account balance, which accumulates until it is capitalized on an agreed date every month. The interest is either reinvested or transferred to another account of your choice. The effective annual interest rate is calculated by taking into account the fact that interest is earned on capitalized interest over a period of 12 months. The rates quoted are indicative rates only and will be confirmed at the time of dealing and are subject to change. Terms and conditions as per your agreement with Mercantile, apply.
